

## Exhibit 2: Central Braid Building in Central Falls

The Central Braid Building is located on the corner of Broad St. and Madeira St. in Central Falls. It is found right on the banks of the Blackstone River. Only part of the original structure is still intact (*above*); two buildings on site appear to have been connected previously by a missing middle section. The left building (*below left*) is 3 1/2 stories tall but fairly small, probably no more than 15 ft. x 25 ft. Plans include re-connecting the buildings and using them for commercial/retail/tourism use connected with the Blackstone River boat tours. *Photos by Niverio Carvalho*
